Re: Response to Request for Safety Data Sheet for Article

Dear valued Customer,

This letter is in response to your request dated June 26th 2020 for providing a Safety Data Sheet for a product that meets the definition of an article under REACH:

“Article: means an object which during production is given a special shape, surface or design which determines its function to a greater degree than does its chemical composition”¹

You requested a Safety Data Sheet for the following 3M product:

Product description : AQ35 NEP A7 water filtration cartridge

Stock ID : 7000051669

Due to the many requests we receive to create Safety Data Sheets for these products, it is 3M common practice to provide letters, such as this one, in response.

A Safety Data Sheet has not been prepared for this product since there is no legal requirement to provide such documents for articles according to Article 31 of the REACH Regulation (EC 1907/2006).

This product, when used under reasonable conditions and in accordance with the directions for use, should not present a health hazard. However, use or processing of the product in a manner not in accordance with the product's directions for use, may affect the performance of the product and may present potential health and safety hazards.

I trust the above information is responsive to your request.

Please contact me if there are any additional questions.

Sincerely,

Marie-Pierre Copin
