

# IB7

## ENTRY-LEVEL PRICING MEETS ADVANCED FEATURES

For start-ups and smaller coffee shops, restaurants, pubs, hotels and delicatessens with budget or space constraints, look no further than IB7.

Despite its appealing price point, this is an espresso machine packed with features often found only in more expensive models. These include LED mood lighting, electronic dosage, automatic boiler fill and adjustable touch panel settings.

Beyond these great features, baristas and coffee shop owners alike love the IB7 for its size. It grants the barista space to create outstanding espresso and other drinks; whilst its small footprint means it fits neatly even where space is at a premium. For those looking for even more space savings, the compact two group model always fits the bill.
