

EXPRESSION PRO

BEAUTIFUL INSIDE & OUT

The result of more than 11,000 development hours, EXPRESSION PRO is a stunning centre piece for high street chains, speciality coffee shops and any high-volume outlet.

Its dual boiler system means better temperature control for higher quality drinks, with one boiler delivering optimum coffee within very precisely defined parameters, whilst the other handles steam.

Thermal insulation, auto-water detection and automatic low power mode until the boiler is full all reduce energy consumption, a surefire financial and environmental benefit.

Once powered up, the Pro offers baristas a large drip tray for easier maneuverability when brewing espresso and an improved visibility gauge for more effective steaming.

Topping off this fantastic machine is the ability to control numerous key features via the colour touch screen; dose programming by time or water volume, advanced ‘All Group Head’ cleaning, programmable schedules for each day of the week with auto on/off and much more.

FEATURES

- Dual boiler system
- Thermal insulated boilers and intelligent energy saving management
- PID electronic temperature control
- Pre-infusion profile for each dose selection. Ability to select on/off time of pre-infusion
- TFT touchscreen display
- Touch pad with white LEDs
- Barista area LED lighting
- Electronic dosage in millilitres (four doses + continuous)
- Volumetric control
- Steam levers with improved ergonomics and redesigned steam wands
- Ergonomic drip tray that increases comfort
- Backlit panel
- Automatic boiler refill
- Boiler drain tap located in centre of the drip tray
- Programmable auto on/off for each weekday
- Quick and easy access to the machine for maintenance
- IB Connect (optional)
- Ergonomic filterholders
