Ethical African

SPECIES

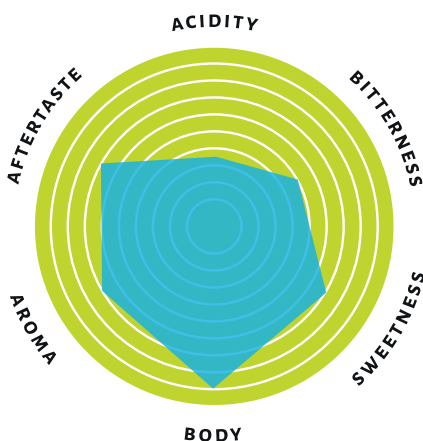

Arabica
Robusta

TASTE NOTES

Sweet Nut, Ripe Cherry
Liquorice, Caramel

STRENGTH

4 / 5

SHAMWARI ETHICAL

INDIA, ETHIOPIA, UGANDA & AFRICA

A flavourful blend with a medium-dark roast profile. This coffee boasts a robust, earthy essence accompanied by a heavy body that satisfies the palate with each sip. Layers of sweetness emerge, combining notes of sweet nut and ripe cherry, while subtle hints of liquorice, caramel, and roasted peanuts add depth and complexity to the brew.

Ethical Coffee Beans

OUR BEANS are amongst the freshest on the market, being roasted to stock in the UK as opposed to importing roasted beans on a much longer timescale. Our Neotech roaster is more environmentally friendly, energy efficient and better than conventional drum roasters in that it can roast in specific small batches with unique roasting profiles that are able to compensate product variations and unfold the unique flavour of each individual coffee blend whilst reducing wasted heat by recirculating in the fully enclosed system.

Our range of Ethical coffees support our partnership with Toybox, who we aim to donate £100,000 over a period of ten years, having donated £50,000 in the last 5 years. This enabled Toybox to provide the resources needed for the street outreach team throughout 2020, conducting 240 visits to children in the most high-risk areas in Guatemala City as well as deliver 100 children across the city a warm and nutritious meal each week. Your continued support of Kingdom Coffee means that we can fund vital projects like this so thank you very much!
